Buy United States Bonds Regularly by Payroll Deduction. Repayment of the \$250,000 loan will be made by the sale of the bonds.

U.S. Patent 4,140,411, issued January 15, 1978, to the inventor, is hereby incorporated by reference into this patent application. The U.S. Patent 4,140,411 discloses a method for the preparation of a polymer film having a high degree of crystallinity and a high degree of orientation. The method involves the preparation of a polymer solution having a high degree of crystallinity and a high degree of orientation, followed by the casting of the solution onto a substrate to form a film. The film is then subjected to a heat treatment to increase its crystallinity and orientation. The heat treatment is carried out at a temperature of about 100°C to 200°C for a period of about 1 hour to 24 hours. The resulting film has a high degree of crystallinity and a high degree of orientation, and is suitable for use in a variety of applications, including as a component in a solar cell.
